Summary

Data Science graduate with 10+ months of professional experience in Python development, machine learning, and statistical analysis. Proven expertise in building RESTful microservices with FastAPI, developing predictive models, and performing comprehensive data analysis. Skilled in end-to-end ML pipeline development, API testing, and deployment. Strong collaborator with experience in Agile environments and cross-functional team coordination. Immediate joiner actively seeking data science opportunities to leverage technical skills in driving data-driven business solutions.

Technical Skills

Programming Languages: Python, SQL, JavaScript, HTML5, CSS3

Data Science & ML: Pandas, NumPy, Scikit-learn, PySpark, Machine Learning, Statistical Analysis, Predictive Modeling

Frameworks & Tools: FastAPI, Django, RESTful APIs, Postman, Poetry, Tableau, Advanced Excel

Databases: MySQL, PHPMyAdmin

Other Technologies: AWS, Web Scraping, JIRA, Git/GitHub, Text Analytics, Data Visualization

Certifications: IBM Machine Learning with Python, HTML/CSS/JavaScript for Web Developers, Python Fundamentals

Professional Experience

Local Mail

November 2023 – February 2024

Jr. Python Developer

Bengaluru, Karnataka, India

- Developed and deployed RESTful microservices using Python and FastAPI framework, creating custom objects for API requests and responses to ensure efficient data handling
- Conducted comprehensive load testing using Postman and provided detailed API documentation to QA team, facilitating seamless integration testing across windows services, APIs, and frontend UI
- Collaborated cross-functionally with QA team to execute integration testing workflows, ensuring quality assurance standards were met across all application layers
- Analyzed and validated changes in non-production environments before production deployments, minimizing risks and ensuring smooth release cycles
- Owned production release deployments and tracked application server issues in JIRA, maintaining system stability and resolving critical incidents
- Built web applications using Python Django framework with MySQL database integration
- **Technologies:** Python, FastAPI, Django, Postman, Poetry, PHPMyAdmin, JIRA, MySQL

Ai Variant

January 2023 – June 2023

Data Scientist

Bengaluru, Karnataka, India

- Executed end-to-end data science pipeline including data acquisition, validation, preprocessing, predictive modeling, and visualization for business intelligence projects
- Gathered, cleaned, and transformed large datasets using Python libraries (Pandas, NumPy, PySpark), improving data quality and enabling accurate analysis
- Developed statistical machine learning models and data mining solutions to address complex business problems, improving decision-making processes
- Performed extensive text analytics on unstructured data, extracting meaningful insights and patterns to support business objectives
- Created interactive dashboards and data visualizations in Tableau, presenting insights to stakeholders and enabling data-driven decision making
- Implemented web scraping solutions to automate data collection from multiple sources, reducing manual effort by 70%
- **Technologies:** Python, Pandas, NumPy, Scikit-learn, SQL, PySpark, Tableau, Web Scraping, Advanced Excel

Sparks To Ideas & The Sparks Foundation

February 2022 – June 2022

Python Developer & Web Developer (Internships)

Ahmedabad, Gujarat, India

- Developed Python applications and web solutions, gaining hands-on experience in software development lifecycle
- Implemented front-end web technologies including HTML5, CSS3, and JavaScript to create responsive user interfaces

Education

Gujarat Technological University (GTU)

July 2019 – February 2025

Bachelor of Engineering in Information Technology

Gujarat, India
